Secretariat

Mission, Objectives, Ways of Working

Coherence

Knowledge Exchange

Monthly Meetings:

- Upcoming Events
- Subgroup Updates
- Presentation(s)
- Discussion

Shared vision

- Building on the work of the DIOWG
- Roots in the STIDS/KGOIDS community
- Being formally established under the Square Dance MOU (in progress)
- Attendance from across defence and national security organisations across the Five Eyes nations

Mission, Objectives, Ways of Working

Mission Statement

To advance ontology engineering across Five Eyes nations through collaborative research and development, creating robust semantic frameworks that enhance intelligence operations and information sharing among allied partners while accommodating the distinct intelligence perspectives, priorities, and operational requirements of each nation.

Mission, Objectives, Ways of Working

Vision Statement

To be the preeminent multi-national hub for intelligence-focused ontology engineering; delivering academically rigorous solutions that seamlessly integrate into operational environments; supporting diverse analytical approaches and intelligence needs across partner nations; and revolutionizing how FVEY partners understand, share, and leverage complex intelligence data regardless of their unique mission focus or use case.

Key Principles

Engineering Excellence:

Apply rigorous ontology design principles to intelligence domain challenges, ensuring flexibility to accommodate varying analytical methodologies and conceptual frameworks.

Operational Impact:

Ensure engineered solutions directly enhance real-world intelligence capabilities across the full spectrum of use cases.

Collaborative Development:

Leverage combined FVEY expertise to create interoperable ontological frameworks for seamless information exchange and collaborative analysis while preserving national perspectives.

Security by Design:

Incorporate security considerations and requirements of all partner nations throughout the engineering process.

Standards-Driven:

Develop and promote shared ontological standards that facilitate seamless intelligence exchange while maintaining the flexibility to support nation-specific intelligence applications and emerging use cases.

Perspective Neutrality:

Embrace, reconcile, and integrate multiple viewpoints on intelligence problems, ensuring ontologies can represent diverse cultural, operational, and analytical perspectives across the FVEY community.

Upcoming Meetings

Typically, on the First Wednesday of the month at 0700AM EST

Upcoming Presentations:

- June – Chris Partridge / Coordinate Systems Ontology
- July – *To Be Determined*
- August – Joe Blankenship / Presentation pending public release
- September – *To Be Determined*
- October – Alec Scully / Mapping of SOSA to BFO
- November – Ernesto / Knowledge Graph Repair
- December – *To Be Determined*

IES-BFO Cross-Ontology Working Group

Chaired by **Nigel D** and **John Beverley**

Contributors include **Chris Partridge, Barry Smith, Paul Cripps, Rebecca Rafferty, Amanda Hicks, Derek Weber, Helena Blackmore, Giacomo de Colle** and more

Let's keep up the great work!

IES-BFO Cross-Ontology Working Group

FOUST: Workshop on Foundational Ontology

- Order in the Mereology of Slots (short paper)
Laure Vieu, Adrien Barton
- Building Up: foundations and material for definitional ontology construction
Brandon Bennett
- Malfunctioning artifacts: A step towards a realizable-centered unifying account
Fumiaki Toyoshima, Ludger Jansen
- Subsumption in the Mirror of Ontological and Logical Choices
Fumiaki Toyoshima, Satoru Niki
- Towards a reference ontology of the spatial location of physical objects
Lucas V. Vieira, Cauã R. Antunes, Mara Abel, Fabricio H. Rodrigues, Lisa Stright
- Comparing Information Exchange Standard and Basic Formal Ontology Design Patterns
Ian Bailey, John Beverley, Helena Blackmore, Andreas Cola, Paul Cripps, Giacomo de Colle, Federico Donato, Amanda Hicks, David Limbaugh, Elena Milivinti, Chris Partridge, Rebecca Rafferty, Barry Smith
- SULO — a simplified upper level ontology
Michel Dumontier, Remko Groenewegen, Komal Gilani, Isabelle de Zegher, Katerina Serafimova, Catalina Martínez Costa, Stefan Schulz

Officially published March 2 2026

Presentations

GeoSPARQL

Presentation to the FOWG, May 2025
Dr Paul Cripps, Dstl on behalf of the GeoSPARQL Standards Working Group (SWG):

Jo Abhayratna, Geoscape Australia (Chair)
Nicholas Car, Kurrawong AI
Arkadiusz Chadzynski, Graphwise
Timo Homburg, Mainz University Of Applied Sciences
Matthew Perry, Oracle
Paul Cripps, Dstl

Looking Ahead

Activities 2026-2027

- Formal Establishment
- Monthly open meetings
- Closed Committee meetings
- Special meetings/workshops
- IES-BFO cross-ontology subgroup
- 5E Ontology Foundry
- Cut some code

How to get involved:

- Give a presentation
- Join a technical subgroup
- Attend monthly meeting
